Scanner Implementation

Becky Saylors

Director of Fixed Assets and Equipment Inventory Services

Virginia Tech

Background

- Performed manual inventories with students
- Purchased handheld scanners (Dolphin)
- Hired a consultant to place barcodes on all equipment at VT
- Wrote off \$50 million of missing equipment
- Implemented Banner Fixed Assets (previously used FAACS)

Where did we start?

- Provided training to departments for the new system and policies (Banner Fixed Assets)
- Obtained buy-in from departments and built relationships
- Created a service request to program handheld scanners and interface to Banner Fixed Assets
- Created Inventory Procedures
 - Planning Phase
 - Meet with Departments
 - Conduct the Inventory
 - Reconciliation Phase
 - Final Report

Programming problems

- We did a few manual inventories with paper and pen and programmed the scanner based on that (September 2001)
- Scanner was too slow, completely re-did programming
- In December 2001 we performed our own inventory (Controller's Office)
- In February we performed the Bursar's inventory still learning and fine tuning procedures
- In March 2002 we started 5 inventories, in April, 12 were started
- Completed over 550 inventories with handheld Dolphin scanners

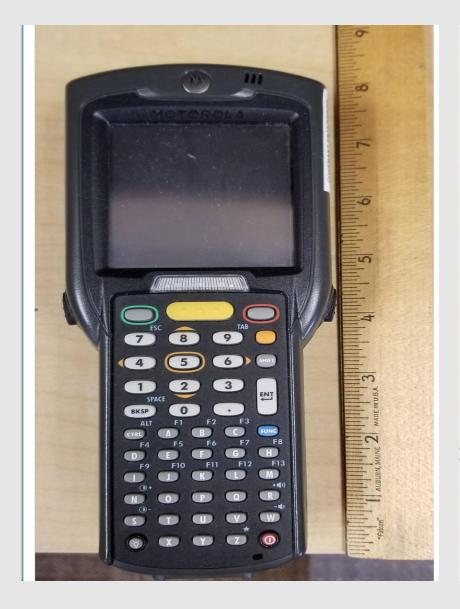

Dolphin Scanners

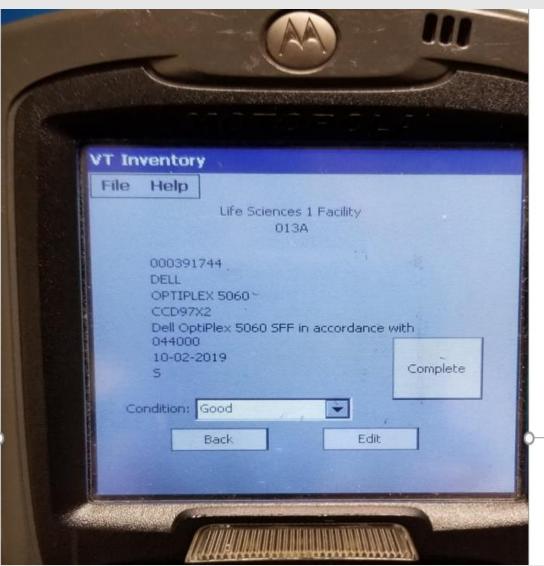

- Hand-held 386 computer
- Weighs less than 1 pound
- 10 megs of memory
- Withstands multiple drops
 of 5 feet
- Held entire database including disposed assets

Current Motorola Scanners

Planning Phase

- Departments should be inventoried once every two years, determine risk for off campus locations vs budget constraints. Priorities could arise due to audit findings/reviews, research intensive, etc.
- Review department listing for number of items, cost, type of items
- How many buildings are involved for the department? Obtain floor plans
- Estimate time based on locations, number and types of assets, space, etc.
- Assign staff as available

Planning Report – Buildings per Department

Pre-Inventory Meeting

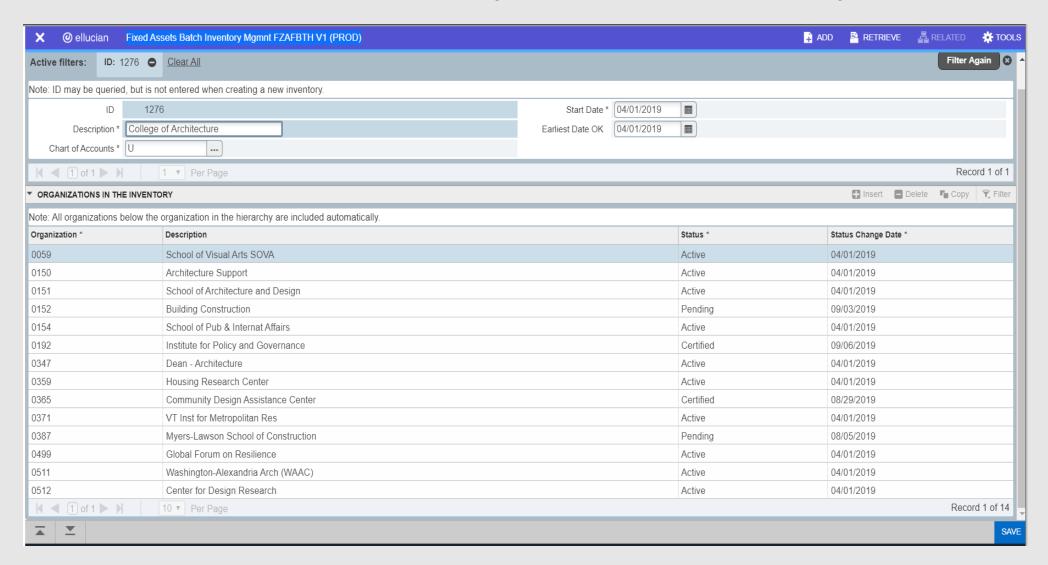

- If necessary meet with the Department Head and Coordinator to seek assistance and cooperation during the inventory process
- Discuss expectations (account for 95% of items and cost, finish within 60 days), email faculty staff concerning the inventory
- Discuss the buildings and any off-site locations
- Discuss potential un-recorded donations, trade-ins, returned to vendor for repair, equipment on loan, fabrications, etc.
- Any personally owned equipment we might find?
- Equipment at home with employees?
- Areas requiring extra care or concern (sensitive experiments, locked areas, safety, etc.), possibly walk through space

Inventory Set up

- Create the inventory in Banner based on the agreed upon date with FZAFBTH and mark the inventory in Active Status
- Review the departmental report prior to the physical inventory
- Download the inventory information to the handheld scanners

FZAFBTH – Create/Update Inventory Status

VIRGINIA TECH.

Physical Inventory

- The inventory team should be accompanied by departmental representative(s) to unlock doors, answer questions, etc.
- Update the room and building if necessary on the scanner prior to entering a room. Check floor plans as necessary.
- Carefully walk around the room looking for equipment. Ask for assistance
- Scan barcodes and review information for accuracy, update as necessary including the condition.
- Upload scanners at lunch and the end of the day for processing.

Challenges

- Locked doors
- Specially marked floors/doors
- Floor plans
- Experiments in progress
- Physical aspect
- People
- Personal safety

Reconciliation

- Review each scanned batch in FZAFBTR for reasonableness (ensure locations and conditions are reasonable)
- If problems are found, reject individual records or the entire batch
- Run FZRFISR report this report is designed to detect potential problems (switched tags, search serial numbers, potential new adds, etc.) or general information.
- Process transactions
- Send department the missing list (FZRFIMS) for follow-up

Final Report

- After the department indicates no more equipment can be located or reached at least 95% of the items and dollars) update the Status from Active to Pending
- Review missing list for equipment that qualifies for Write-Off (should have a procedure for this)
- Prepare Final Report to the Department Head
- Once approval is received update Status from Pending to Certified and the condition code for missing assets

Final Report Example

Virginia Tech Movable Equipment Inventory Summary Report by Department

Equipment Inventory Report for

Senior Management: S01 Agriculture & Life Sciences

Department: 0010 College of Natural Resources
